

Position: Senior Python Backend Developer

Company: TechCorp Malaysia Sdn Bhd

About the Role:

We are looking for a Senior Python Developer to join our growing engineering team. You will build and maintain scalable backend services.

Requirements:

- 4+ years of Python development experience
- Strong experience with FastAPI or Django REST Framework
- PostgreSQL and database optimization
- RESTful API design and development
- Docker and containerization
- Git version control
- Experience with cloud platforms (AWS or GCP preferred)

Nice to Have:

- Redis for caching
- Celery for task queues
- CI/CD pipeline experience

Salary: RM 8,000 - RM 12,000 per month

Location: Kuala Lumpur (Hybrid)
